nodejs and npm

sachin

2013-10-21 Mon

Contents

1 nodejs

```
./configure --prefix ~/bin/nodejs
make
make install
```

2 npm

```
make
make install
```

it got installed in `~/lib` by default

3 for webRTCcopy

- Clone

  ```
  git clone https://github.com/erbbysam/webRTCCopy.git
  npm install ws express
  ```

- and then

  ```
  node ~/server/site/server.js
  ```

  (or use the forever node.js module to keep it running)

- or for secure/wss:

  ```
  node ~/server/site/server-secure.js
  ```

  (or use the forever node.js module to keep it running)
